

ROSS UNIVERSITY  
SCHOOL OF VETERINARY MEDICINE

IS HIRING!

***To make a difference, you have to be different. That's what we strive to be.***

### **THE ROSS DIFFERENCE**

We are proud of our students and the diversity of the cultures and nationalities of our colleagues; they make us unique. We are true participants in a global society and in the One Health initiative.

### **Who Are We:**

Founded in 1982, Ross University School of Veterinary Medicine, a St. Kitt's vet school, has graduated nearly 6,000 veterinarians who today practice medicine across the U.S., Canada, Puerto Rico, and beyond. Our high-tech campus is located on the beautiful Caribbean island of St. Kitts and accredited by the American Veterinary Medical Association Council on Education (AVMA-COE). We offer an entirely unique opportunity to tomorrow's prospective veterinarians.

### **About the Job:**

#### **Why will you enjoy this new opportunity?**

This isn't your ordinary vet school. Ross Vet is a gateway to new worlds, species, and connections. Live and work in an environment that pushes you to see things differently- helping you grow and contribute as a veterinary leader.

#### **What Success Skills are Important in this Role: *Will I be successful?***

- **Compassion** - At Ross University School of Veterinary Medicine, you will guide our students to learn adaptability, resilience, and patience fostered by island life and a rigorous academic program.
- **Community Focused** – On St. Kitts, everyone knows everyone. As part of the island community, you experience a melting pot of people who come from everywhere and contribute to our focus on continuous improvement and advancement of veterinary education.

- **Innovative** - Strengthened by a culture of connectivity and a fundamental commitment to integrated One Health research, you'll find the path that advances your veterinary career and global connection.

**What type of work will you be doing? What assignments and requirements will I perform on a regular basis?**

**Expect a Variety of The Following**

- Provide challenging, student-focused, delivery of a General Anatomy course utilizing multi-modal learning within a collaborative climate.
- Commitment to student success and continuous learning through formative and summative assessment and curricular modification to ensure measurable success of the students.
- Contribute to a professional learning community while instructing in:
  - Interactive clinically based anatomy dissection laboratory sessions
  - Clinically relevant gross anatomy lectures
- Progressively build on student's skills and knowledge that will supply them with excellent anatomical knowledge for their clinical rotations and beyond.
- Take the lead or join in with a variety of clinically or [anatomically relevant research projects](#)
- Knowledge of teaching and learning strategies to meet the needs of diverse learners.
- Willingness to share talents with a sense of humor, and a hopeful, caring, and open attitude.

**What is the structure and culture of the team like?**

We are a small university with a diverse and proactive team focused on collaboration and providing a student and colleague centric environment of care and respect. You will join a team of 4 enthusiastic anatomy professionals and three laboratory technical staff. You will work under the guidance of the Division and Department Heads.

Make a difference and embrace change...***We Are Ross Vet!***
